

Arnaud Gueulette

Data & AI Governance Solutions Architect

Collibra, AWS, Azure | Metadata, Data Quality, Reference Data & AI-ready Governance

Location: Brussels, Belgium | **Phone:** +32 488 69 25 31 | **Email:** arnaud_gueulette@outlook.fr

PROFESSIONAL SUMMARY

Data & AI Governance Solutions Architect helping organizations make data, analytics, and AI use cases trustworthy by embedding governance directly into platforms and delivery processes. Hands-on across Collibra, AWS, and Azure, with experience turning governance principles into working systems: metadata models, data quality checks, reference data controls, workflows, lineage, and operational guardrails for reliable data and AI-enabled decision-making.

PROFESSIONAL EXPERIENCE

Data Consultant, [Datashift NV](#)

Feb 2025 – Present

- [UCB](#) – Data Enablement Team

Oct 2025 – Present

- Supporting SQL-based data quality checks across multiple domains by introducing structured templates, reusable query logic, and consistent validation standards.
- Improving product reference data completeness and consistency across Snowflake and external systems by analyzing reference tables, resolving inconsistent identifiers, and designing exact, hierarchical, and fuzzy-matching approaches.
- Leading a proof-of-concept evaluating the **Collibra Model Context Protocol (MCP)** as a natural-language discovery and interaction layer for governed metadata, business glossaries, data assets, and quality rules.
- Delivered a policy-aware M365 Copilot agent guiding users through compliant Collibra asset submissions, reducing submission errors through structured templates, JSON schemas, Excel import logic, and scenario-based testing.

- [Scania CV](#) – Data Governance Initiative

Mar 2025 – Present

- Operationalizing governance-by-design across **Collibra Data Intelligence Platform**, **Collibra Data Quality**, metadata ingestion, lineage, reference data, and AWS platform capabilities, turning governance requirements into reusable workflows, controls, and operational patterns.
- Designing and deploying AWS-based governance automation using **EKS**, **Lambda**, **EventBridge**, **RDS**, Terraform, Terragrunt, Docker, and Kubernetes to improve data quality monitoring, metadata operations, and platform reliability.
- Implementing Collibra Data Quality, metadata ingestion pipelines, BPMN workflows, and platform monitoring patterns to move governance from documentation into operational processes, enabling new lineage visibility and more reliable governance operations.

- **[Datashift NV](#) – Internal Initiatives**

Feb 2025 – Present

- Developed reusable AWS deployment frameworks using Terraform and Terragrunt for Soda Agent and Collibra DQ standalone with external RDS metastore, enabling faster Infrastructure-as-Code deployments.
- Designed a Data Quality & Governance demo environment integrating Soda, dbt, Airflow, Superset, Python, and Collibra to demonstrate automated validation, lineage, and governance integration patterns.
- Explored Collibra MCP for AI-powered data governance use cases, including natural-language metadata discovery, asset exploration, and governance workflow support.
- Trained 10 colleagues on Soda from the ground up, helping scale automated data quality practices across client engagements ([LinkedIn post](#)).

Data Consultant, [Sopra Steria Benelux](#)

Sept 2022 – Jan 2025

- **[eu-LISA](#) – Schengen Information System (SIS)**

June 2024 – Dec 2024

- Enhanced and maintained eu-LISA's border-security systems by developing, testing, and deploying improvements in PREPROD, ensuring performance, reliability, and EU-standard compliance. Collaborated with cross-functional teams to integrate changes and produced technical documentation to streamline future maintenance.

- **[Eurocontrol](#) – ISOBAR**

March 2023 – Oct 2023

- Designed and deployed a multi-step flight-forecasting model as an online **API endpoint** to help operators optimize arrival/departure flows under varying weather conditions, reducing manual workload and enabling data-driven operational decisions.

- **[Sopra Steria Benelux](#) – Internal Initiatives**

Sept 2022 – Jan 2025

- Researched and documented AI-assisted development tools (**GitHub Copilot**, prompt engineering) to support **SDLC** tasks, evaluating productivity gains and privacy implications.
- Prototyped **Elasticsearch** integration into existing data systems to improve search performance and query expressiveness.
- Built an end-to-end pipeline to extract and process PDF-based energy-consumption invoices into the **SAS IBM Envizi ESG Suite**, improving **ESG reporting** and internal analytics.
- Delivered a **PoC** data system surfacing energy-invoice **KPIs** to support sustainability tracking and cost-efficiency decisions.

SELECTED PROJECTS & FOCUS AREAS

- **Reference Data Governance in Collibra**

Designed a governance model for Code Sets, Code Values, Crosswalks, lifecycle states, stewardship roles, workflows, and trusted consumption patterns, distinguishing accepted, implemented, and actively consumed reference data.

- **AI-ready Context Governance**

Developed a practical thesis and implementation approach for using governed business, technical, operational, and policy context to support trustworthy AI agents, GenAI use cases, and metadata-driven discovery. Applied this through Collibra MCP experimentation and thought-leadership work around governed context for enterprise AI.

- **Cloud Data Governance Operations**

Supported AWS-based governance infrastructure, automation, monitoring, and platform reliability for Collibra DQ, metadata ingestion, and governance operations.

EDUCATION

Master's Degree in Data Science, [Université Catholique de Louvain](#)

2020 – 2023

- Master's Degree in **Data Science** with specialization in **Statistics**.
GPA: 3.0

Bachelor's Degree in Business Engineering, [Université Catholique de Louvain](#)

2017 – 2020

- Bachelor's Degree in **Business Engineering** with specialization in **Computer Science** and **Operational Research**.
GPA: 3.0

TECHNICAL SKILLS

Data Governance & Quality

Collibra: Catalog, Lineage, Workflow, Integration, Data Quality
Soda, Great Expectations, Data Quality Frameworks

Python Engineering & AI Enablement

Scikit-learn, SQLAlchemy, Pydantic, PyTest, Flask, FastAPI

Cloud Platforms

AWS: S3, EC2, RDS, Glue, Athena, Lambda, Lake Formation, EventBridge, EKS, CloudWatch, IAM, SQS, SNS

Azure: Data Lake, Data Factory, ML Studio, Synapse Analytics

Infrastructure as Code & DevOps

Terraform, Terragrunt, Docker, Kubernetes, Helm, Rancher, GitLab CI/CD, GitHub Actions

Data Engineering & Orchestration

Apache Airflow, dbt, Apache Spark, pandas, PySpark, Kafka, Debezium

Data Systems & Databases

Snowflake, PostgreSQL, MySQL, Microsoft SQL Server, MongoDB, Elasticsearch

BI & Visualization

Power BI, Apache Superset, Grafana, Kibana

Programming & Languages

Python, SQL, Java, Linux/Bash

Other Tools

Power Automate, Git, Jira, Confluence

LANGUAGES & PROFESSIONAL STRENGTHS

Languages: French C2/native, English C1, Dutch B1.

Strengths: stakeholder communication, problem-solving, business-driven delivery, critical thinking, continuous learning, Agile collaboration.

CERTIFICATIONS

Collibra

- [Collibra Solution Architect Certification](#)

AWS

- [AWS Certified Solutions Architect – Associate \(SAA-C03\)](#)
- [AWS Certified Data Engineer – Associate \(DEA-C01\)](#)
- [AWS Certified CloudOps Engineer – Associate \(SOA-C03\)](#)
- [AWS Certified Developer – Associate \(DVA-C02\)](#)

Soda

- [Soda Certified: Cloud Fundamentals](#)

Microsoft

- [Microsoft Certified: Azure AI Fundamentals](#)
- [Microsoft Certified: Azure Data Fundamentals](#)
- [Microsoft Certified: Azure Fundamentals](#)

SAS

- [SAS Certified Specialist: Base Programming Using SAS 9.4](#)

ACHIEVEMENTS

Hackathon

- [EU Defence Innovation Scheme \(EUDIS\) – Hackathon 2024](#)
 - Team EUnify – 1st (Belgium) – 3rd (Europe)
