

Arnaud Gueulette

Data & AI Governance Solutions Architect

Collibra, AWS, Azure | Metadata, Data Quality, Reference Data & AI-ready Governance

Location: Brussels, Belgium | **Phone:** +32 488 69 25 31 | **Email:** arnaud_gueulette@outlook.fr

PROFESSIONAL SUMMARY

Data & AI Governance Solutions Architect helping organizations make data, analytics, and AI use cases trustworthy by embedding governance directly into platforms, metadata, workflows, data quality controls, reference data, and cloud operations.

Hands-on across Collibra, AWS, and Azure, with experience translating governance principles into working systems: metadata and asset models, data quality checks, lineage, BPMN workflows, reference data controls, platform automation, and operational guardrails for reliable data and AI-enabled decision-making.

Current focus: AI-ready governance through governed metadata, reference data, context management, Collibra MCP experimentation, and cloud-based governance automation.

PROFESSIONAL EXPERIENCE

Data & AI Governance Solutions Architect, [Datashift NV](#)

Feb 2025 – Present

- Operationalizing governance-by-design for [Scania CV](#) across **Collibra Data Intelligence Platform**, **Collibra Data Quality**, metadata ingestion, lineage, reference data, and AWS platform capabilities, turning governance requirements into reusable workflows, controls, and operational patterns.
- Designing and deploying AWS-based governance automation for [Scania CV](#) using **EKS**, **Lambda**, **EventBridge**, **RDS**, **Terraform**, **Terragrunt**, **Docker**, **Kubernetes**, and **CloudWatch** to improve data quality monitoring, metadata operations, and platform reliability.
- Implementing Collibra Data Quality, metadata ingestion pipelines, BPMN workflows, and platform monitoring patterns for [Scania CV](#) to move governance from documentation into operational processes, enabling new lineage visibility and more reliable governance operations.
- Leading the design and delivery of product reference data improvements for [UCB](#) across Snowflake and external systems, resolving inconsistent identifiers and designing exact, hierarchical, and fuzzy-matching approaches to raise completeness and consistency.
- Leading the design, development, and delivery of AI-enabled governance initiatives for [UCB](#), including Collibra MCP experimentation for natural-language metadata discovery and a policy-aware M365 Copilot agent for compliant Collibra asset submissions, built on structured templates, JSON schemas, Excel import logic, and scenario-based testing.
- Leading the standardization of SQL-based data quality checks across multiple domains for [UCB](#), introducing structured templates, reusable query logic, and consistent validation standards.
- Developed reusable AWS deployment frameworks using Terraform and Terragrunt for Soda Agent and Collibra DQ standalone with an external RDS metastore, enabling faster Infrastructure-as-Code deployments.

Data Engineer / Software & Data Consultant, [Sopra Steria Benelux](#)

Sept 2022 – Jan 2025

- Enhanced and maintained [eu-LISA](#)'s border-security systems (Schengen Information System) by developing, testing, and deploying improvements in PREPROD, ensuring reliability, performance, documentation quality, and alignment with EU-standard delivery requirements.

- Designed and deployed a multi-step flight-forecasting model as an online **API endpoint** for [Eurocontrol](#)'s ISOBAR project to help operators optimize arrival and departure flows under varying weather conditions, reducing manual workload and supporting data-driven operational decisions.
- Built an end-to-end pipeline to extract and process PDF-based energy-consumption invoices into the **SAS IBM Envizi ESG Suite**, improving **ESG reporting** and internal analytics.
- Delivered a **PoC** data system surfacing energy-invoice **KPIs** to support sustainability tracking, reporting, and cost-efficiency analysis.
- Researched and documented AI-assisted development tools, including **GitHub Copilot** and prompt engineering practices, to evaluate **SDLC** productivity gains and privacy implications.
- Prototyped **Elasticsearch** integration into existing data systems to improve search performance and query expressiveness.

SELECTED GOVERNANCE ARCHITECTURE FOCUS AREAS

- **Reference Data Governance in Collibra**

Designed a practical governance model for Code Sets, Code Values, Crosswalks, lifecycle states, stewardship roles, workflows, and trusted consumption patterns, distinguishing accepted, implemented, and actively consumed reference data.

- **AI-ready Context Governance**

Developed a practical approach for using governed business, technical, operational, and policy context to support trustworthy AI agents, GenBI use cases, metadata-driven discovery, and Collibra MCP experimentation.

- **Cloud Data Governance Operations**

Supported AWS-based governance infrastructure, automation, monitoring, and platform reliability for Collibra Data Quality, metadata ingestion, lineage, and operational governance processes.

EDUCATION

Master's Degree in Data Science, [Université Catholique de Louvain](#)

2020 – 2023

- Specialization in **Statistics**. Graduated **Cum Laude**.
- Thesis: Time Series Forecasting: Comparison of Box-Jenkins, Hybrid and Machine Learning Methods, comparing classical statistical methods (Box-Jenkins/ARIMA) against hybrid and machine learning approaches, including the M4-competition-winning **ES-RNN** model.

Bachelor's Degree in Business Engineering, [Université Catholique de Louvain](#)

2017 – 2020

- Specialization in **Computer Science** and **Operational Research**. Graduated **Cum Laude**.

TECHNICAL SKILLS

Data & AI Governance Platforms

Collibra Data Intelligence Platform, Collibra Data Quality, Collibra Catalog, Collibra Lineage, Collibra Workflows, BPMN, Collibra MCP

Governance Architecture & Reference Data

Stewardship Workflows, Lifecycle Management, Data Ownership, AI-ready Context Governance, Reference Data Governance (Code Sets, Code Values, Crosswalks), Metadata & Asset Models, Data Quality Frameworks & Controls, Business Glossaries, Data Lineage

Cloud & Platform Engineering

AWS S3, EC2, RDS, Glue, Athena, Lambda, Lake Formation, EventBridge, EKS, CloudWatch, IAM, SQS, SNS; Azure Data Lake, Data Factory, Synapse Analytics, Azure AI Services

Infrastructure as Code & DevOps

Terraform, Terragrunt, Docker, Kubernetes, Helm, Rancher, GitLab CI/CD, GitHub Actions

Data Engineering, APIs & AI Enablement

SQL, Python, Apache Airflow, dbt, Apache Spark, PySpark, pandas, Kafka, Debezium, FastAPI, Flask, SQLAlchemy, Pydantic, PyTest, M365 Copilot agents, MCP-based metadata discovery

Data Systems & Analytics

Snowflake, PostgreSQL, MySQL, Microsoft SQL Server, MongoDB, Elasticsearch, Power BI, Apache Superset, Grafana, Kibana

Collaboration & Delivery

Git, Jira, Confluence, Power Automate, Agile Delivery, Technical Documentation

CERTIFICATIONS

Collibra

- [Collibra Solution Architect Certification](#)

AWS

- [AWS Certified Solutions Architect – Associate \(SAA-C03\)](#)
- [AWS Certified Data Engineer – Associate \(DEA-C01\)](#)
- [AWS Certified CloudOps Engineer – Associate \(SOA-C03\)](#)
- [AWS Certified Developer – Associate \(DVA-C02\)](#)

Soda

- [Soda Certified: Cloud Fundamentals](#)

Microsoft

- [Microsoft Certified: Azure AI Fundamentals](#)
- [Microsoft Certified: Azure Data Fundamentals](#)
- [Microsoft Certified: Azure Fundamentals](#)

SAS

- [SAS Certified Specialist: Base Programming Using SAS 9.4](#)

AWARDS

Hackathon

- [EU Defence Innovation Scheme \(EUDIS\) – Hackathon 2024](#)
 - Team EUnify – 1st (Belgium) – 3rd (Europe)

LANGUAGES & PROFESSIONAL STRENGTHS

Languages: French C2/native, English C1, Dutch B1.

Strengths: stakeholder communication, problem-solving, business-driven delivery, critical thinking, continuous learning, Agile collaboration.
